

# How-to guides

## 29) How to monitor the cost of your phone calls (using the How Much? service at [www.tellmehowmuch.co.uk](http://www.tellmehowmuch.co.uk))

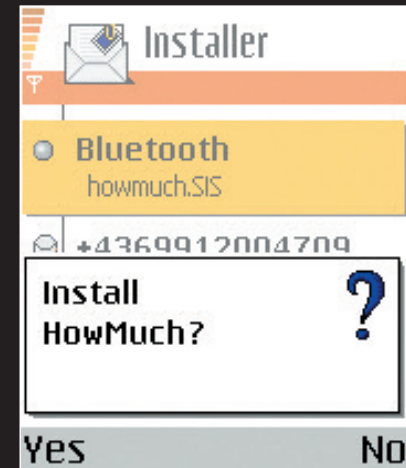

1. Point your web browser to the How Much? website at [www.tellmehowmuch.co.uk](http://www.tellmehowmuch.co.uk). Here you will be able to find out all about the service.

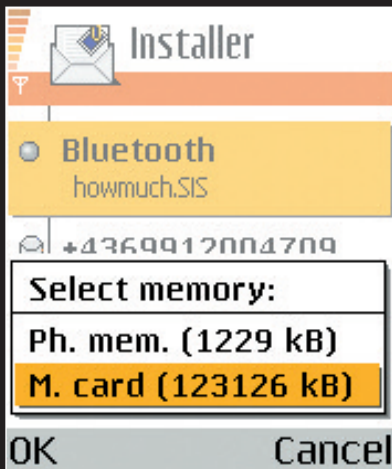

2. Click on 'Get How Much?' to see a list of compatible handsets. At the moment all Series 60 handsets are supported, with more to follow.

If your model is on the list, text the word **HOWMUCH** to **83070**. You will receive a text message in return, for which the charge is 75p. Click the link within the text message and the software will start to download.

3. Once the software has downloaded you will be asked if you wish to install. Click 'Yes'.

4. Choose whether to install on the phone's internal memory or the memory card.

5. The software is now installed. Start the program from the Application menu. First select your network.

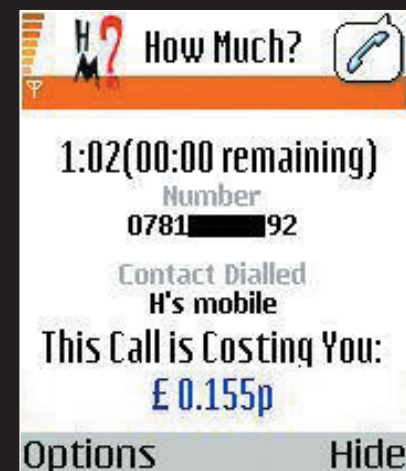

6. Now specify your monthly tariff, according to how much the call costs are. For details on current price plans see our Buyer's Guide p88.

7. Input how many inclusive minutes you are entitled to and the date of your monthly billing day.

8. How Much? is now active. You can hide this screen by pressing the right soft-key.

9. Now when you make a call the cost is displayed on screen, as you are talking. Don't spraff too much!
